About TPF

Making world a better to live is what Tayseer Al-Sheikh for Operations & Maintenance Est (TOM), has been aiming for since number of years in Saudi Arabia. Working since 2009, the company has managed to involve manufacturing and marketing together. The company manufactures and markets the technical service which helps in every level of treatment through chemical programs. The expanding and revolutionary needs in the reclaimed area have made our direction towards the production of the finest quality of chemical, relevant acids and fertilizers. This has led to the innovative improvement in achieving the excellence in the production making every effort a fruitful one.

The leading companies rely on TOM to drive value and sustainability actively with the enforcement in technologies and expertise to improve and facilitate operations. With the constant changes and new products introduction, results in the mixture process. The saleable products are offered at such cost effective prices keeping demand and safety clearly in mind.
