The Aeration and Mixing Experts - Innovative Technology Worldwide

Rooted locally, active worldwide - From a family business to a global player

We, FUCHS Enprotec GmbH, a subsidiary of Aqua-Aerobic Systems, Inc. (Loves Park, IL USA), are a globally recognized manufacturer of aerators and mixers for waste water and sewage sludge treatment.

As a German company, we offer economical components for municipal and industrial applications. The quality of our work is certified according to ISO 9001: 2015. All FUCHS products are manufactured in accordance with the EC Machinery Directive and comply with the associated safety regulations.

With our profound expertise from more than 40 years and projects in around 60 countries around the world, we are a recognized partner in the field of environmental technology.

In close cooperation with our sales partners, we ensure that comprehensive support for our customers is guaranteed at all times.

Driven by our claim to quality, the consistent advancement of our products and services, our partnership with customers, suppliers and employees, we see ourselves well equipped for future requirements and continue to strive for healthy growth.

Applications:

- Activated Sludge
- Aerated Lagoons
- Replacement and Retrofit
- Equalization Basins
- Mine Water Treatment
- Sewage Sludge Treatment

Finding together the best solution

Meeting the requirements of our customers is our top priority.

With the versatile, adaptable aerators and mixers and our wealth of experience from more than four decades, we developed an individual solution for every project. We answer your questions about the treatment of municipal wastewater or industrial wastewater of various origins.
